SAFETY SPECIALIST/MANAGER

Drexel Chemical Company, a leading manufacturer of quality agricultural products is looking to immediately hire a qualified Safety Specialist/Safety Manager.

PRINCIPLE RESPONSIBILITIES:

- Actively develop and implement company safety procedures, including Process Safety Management Plans, Lock Out/Tag Out, Hot Work Permits, contractor safety, job hazardous analysis, and PPE.
- Work with Plant Management to help resolve identifiable issues and ensure compliance with applicable laws regulating plant operation including OSHA compliance.
- Promote a safety culture that will minimize the number and reduce the severity of accidents and injuries.
- Plan and conduct safety training for all employees in compliance with safety regulations.
- Coordinate with EHS Department Manager, Corporate staff, and Plant Managers to implement all aspects of the company safety program including training, recordkeeping, process development, and the resolution of safety issues.
- Perform routine safety inspections of all locations to ensure conformity with company protocols and procedures.
- Respond to safety incidents and other violations of the company safety policy, perform root causes analyses, and recommend corrective/preventive action plans.
- Assist in emergency response to injuries, spills, and other incidents at Drexel facilities.

QUALIFICATIONS/REQUIREMENTS:

- 4-year college degree in Safety, Engineering, or a related field is preferred.
- Knowledge of OSHA regulations, accident rate reduction strategies, and safety training.
- Minimum of 3-5 years of verifiable safety experience in a manufacturing environment.
- 1-2 years of Supervisory/Management experience is preferred.
- High level of communication skills, as the position entails a lot of training and interaction with plant management and personnel.
- Excellent skills in Microsoft Office (Word, Excel, Outlook, PowerPoint) are a must.
- Excellent writing and editing skills with strong attention to detail and high degree of accuracy.
- Basic working knowledge of chemical unit operations, including manufacturing and packaging.
